
Phase One Environmental Site Assessment

Portion of 18725 McCowan Road
East Gwillimbury, Ontario

Rice Group Limited

Table of Contents

Figure Index

Appendix Index

1. Executive Summary

GHD Limited (GHD) was retained by Rice Group Limited (Rice Group) to conduct a Phase One Environmental Site Assessment (ESA) of a portion of the property located at 18725 McCowan Road in East Gwillimbury, Ontario (herein referred to as the Site or Property). The Site is currently owned by Overholt Farm Limited.

The Site is an irregular-shaped parcel of land that is approximately 20 hectares (50 acres) in size. The Site is part of a larger parcel of land that is approximately 83 hectares (205 acres) in size and used for agricultural and residential purposes. The Site is currently vacant, vegetated land.

The Site was used for agricultural cropland purposes (primarily potatoes, corn, wheat, soybeans, and hay) from at least 1927 until 1990, at which time it was developed as a sand and gravel pit. The Site was operated as a sand and gravel pit from 1990 until 2005, when it was rehabilitated by grading the ground surface to a gradual slope, and reportedly re-distributing overburden soil that was initially stripped from the Site when the sand and gravel pit began operation. Based on information obtained during the Phase One ESA, fill material has not been imported to the Site.

During operation of the sand and gravel pit, there was reportedly a scale, scale house, and diesel fuel aboveground storage tank (AST) located on the northeastern portion of the Site. A water supply well was also present on the northeastern portion of the Site, which supplied water to a washroom located in the scalehouse. The washroom discharged to an on-Site septic system consisting of a septic tank and leaching field. The scale, scale house, AST, water supply well, and septic system were completely removed during closure of the sand and gravel pit. An asphalt paved driveway is still present on the northwestern portion of the Site, which was used to access the scale and scale house.

The purpose of the Phase One ESA was to identify, through a non-intrusive investigation, the existence of any Potentially Contaminating Activities (PCAs) and Areas of Potential Environmental Concern (APECs) associated with the Site. PCAs and APECs are defined in O. Reg. 153/04. It is GHD's understanding that the Phase One ESA was completed to document environmental conditions at the Site in support of the proposed filling of the former sand and gravel pit on the Site to support a future agricultural use, and that a Record of Site Condition (RSC) may be completed at a future date.

Based on the results of the Phase One ESA, including the Site inspection, information provided by Site representatives and regulatory agencies, documents reviewed, the review of Site history, and receipt and review of information from the Ministry of the Environment and Climate Change (MOECC), the following APECs were identified to be associated with the Site:

APEC #1 – Potential Historic Pesticide Use (on-Site): The Site has been used for agricultural cropland purposes (primarily potatoes, corn, wheat, soybeans, and hay) from at least 1927 until 1990, at which time it was developed as a sand and gravel pit. No specific information was available regarding the historic use of pesticides on Site. The potential use of pesticides on the Site is included in O. Reg. 153/04 as a PCA (#40 – Pesticides (including Herbicides, Fungicides, and

Anti Fouling Agents) Manufacturing, Processing, Bulk Storage, and Large Scale Applications), and has been identified in this report as **APEC #1**.

APEC #2 – Former Diesel Fuel AST (on-Site): Equipment such as loaders and mobile aggregate crushers/stackers were reportedly refueled on-Site while the Site was operated as a sand and gravel pit. The diesel fuel was reportedly stored in an AST near the scale house. At the time of the Site inspection, there were no ASTs present at the Site. The historic storage of diesel fuel in ASTs is included in O. Reg. 153/04 as a PCA (28 – Gasoline and Associated Products Storage in Fixed Tanks), and has been identified as **APEC #2**.

APEC #3 – Potential Former Pole-Mounted Transformer (on-Site): During the Site inspection, GHD observed a wooden utility pole on the northeastern portion of the Site, in the vicinity of the former scale and scalehouse. Disconnected electrical and telephone cables were visible on the wooden pole. Electricity was historically supplied to the former scale and scalehouse via a pole-mounted transformer historically attached to this wooden pole. Facility personnel stated the transformer was owned by Ontario Hydro and they were not aware of any spills or releases from the transformer. The pole-mounted transformer had been removed prior to the Site inspection. No other information was obtained during the Phase One ESA regarding the potential former pole-mounted transformer. The use of transformers is included in O. Reg. 153/04 as a PCA (55 – Transformer Manufacturing, Processing and Use), and has been identified as **APEC #3**.

2. Introduction

2.1 Phase One ESA Property Information

GHD Limited (GHD) was retained by Rice Group Limited (Rice Group) to conduct a Phase One Environmental Site Assessment (ESA) of a portion of the property located at 18725 McCowan Road in East Gwillimbury, Ontario (herein referred to as the Site or Property). The Site is currently owned by Overholt Farm Limited. Compass directions (north, east, south, west) described in this report are referenced to “Project North”, which is oriented parallel to McCowan Road. A Site Location Map and a Site Plan are provided on Figure 1 and Figure 2, respectively.

The purpose of the Phase One ESA was to identify, through a non-intrusive investigation, the existence of any Potentially Contaminating Activities (PCAs) and Areas of Potential Environmental Concern (APECs) associated with the Site. PCAs and APECs are defined in Ontario Regulation 153/04 (O. Reg. 153/04). It is GHD's understanding that the Phase One ESA was completed to document environmental conditions at the Site in support of the proposed filling of the former sand and gravel pit on the Site to support a future agricultural land use, and that a Record of Site Condition (RSC) may be completed at a future date. Contact information for the Property owner’s representative (Rice Group) is listed below:

Mr. Ari Soberano
Finance Manager, Development
Rice Group Limited
15 Gormley Industrial Avenue,Unit 3, Box 215
Gormley, Ontario L0H 1G0

(905) 888-1277
Ari.Soberano@ricegroup.ca

The Site is an irregular-shaped parcel of land that is approximately 20 hectares (50 acres) in size. The Site is part of a larger parcel of land that is approximately 83 hectares (205 acres) in size and used for agricultural and residential purposes. The Site is currently vacant, vegetated land.

3. Scope of Investigation

The Phase One ESA was conducted in accordance with the requirements of O. Reg. 153/04, as amended. The Phase One ESA was conducted by Mr. Nicholas Cole and was reviewed by Mr. Warren Croft both of GHD. The qualifications of Mr. Cole and Mr. Croft are presented in Appendix A. The following tasks were conducted as part of the Phase One ESA:

- Review of an electronic environmental database search of federal, provincial, and private source databases.
- Review of available historical records including fire insurance plans, aerial photographs of the Site and surrounding area, regional geological information, and previous environmental reports.
- Review of past and current Property usage and adjacent property occupancy.
- Review of Property title records and survey documents.
- Inspection of the facilities, equipment, utility services, operations, and associated records for the Site.
- Observations of any conditions that represented potential environmental concerns.
- Review of chemical use and storage and spill/release incidents.
- Review of aboveground and underground storage tank records.
- Review of waste handling, accumulation, storage, and disposal practices.
- Review of air emissions and wastewater discharges.
- Review of equipment that potentially contains chlorofluorocarbons.
- Review of equipment that potentially contains polychlorinated biphenyls.
- Observations of potential lead-based paint.
- Observations of potential asbestos-containing materials.
- Inquiries with regulatory agencies and interviews with persons knowledgeable of the Site and Site operations.

In completing the Phase One ESA, GHD relied on information received from all parties as being accurate unless contradicted by written documentation or field observations.

The following report summarizes the information gathered by GHD during the Phase One ESA and identifies any PCAs, as defined in O. Reg. 153/04, within the Phase One ESA study area as well as any APECs associated with the Site. As required by O. Reg. 153/04, this Phase One ESA also

identifies any potential contamination migration pathways and receptors associated with the Property, to the extent that the data compiled allows.

This Phase One ESA report has been prepared for the use of Rice Group and may not be relied upon by others without the written consent of GHD and Rice Group.

4. Records Review

4.1 General

4.1.1 Phase One ESA Study Area Determination

The Phase One ESA study area included all properties located wholly or partially within 250 metres of the boundary of the Site, as required by O. Reg. 153/04. This area has been determined by GHD to be a sufficient study area since the assessment did not identify any properties with known environmental impact or high potential to impact the Site from a distance of greater than 250 metres.

The properties adjacent to the Site were visually inspected, without accessing the properties, for evidence of existing or potential environmental concerns related to the Phase One ESA. GHD also visually inspected all of the Properties within the Phase One ESA study area that were visible from the Site or surrounding streets. The following buildings or features were located on the properties surrounding the Site:

North: The Site is generally bound to the north by a farmstead and agricultural cropland. An access road that is part of the Site is located to the north of the farmstead.

West: The Site is generally bound to the west by a farmstead and McCowan Road, and further to the west by rural residential properties and a horse farm.

South: The Site is generally bound to the south by a residential property and Mill Road, and further to the south by agricultural cropland, vacant land, and a farmstead.

East: The Site is generally bound to the east by agricultural cropland, and further to the east by a railway track.

Persons familiar with the Site were not aware of any environmental impacts to the Site attributable to operations conducted on adjacent lands. No visual evidence of environmental impact to the Property from surrounding land uses was observed by GHD at the time of the Site inspection.

4.1.2 First Developed Use Determination

Based on a review of the aerial photographs, the Site has been utilized as agricultural land since at least 1927, and is part of a larger property that includes land to the north and east of the Site. Based on discussions with the Property owner, the house on the adjacent farmstead to the Site, which is located on the larger parcel of land surrounding the Site, was constructed in approximately 1845. No previous buildings have reportedly been constructed on the Site, with the exception of a scale house between approximately 1990 and 2005, associated with the operation of the sand and gravel pit at the Site.

4.1.3 Fire Insurance Plans

Fire insurance plans (FIPs) assist in the identification of historical land use and commonly indicate the existence and location of aboveground and underground storage tanks, structures, improvements, and facility operations. GHD contracted Opta Information Intelligence (Opta) to search for any available fire insurance maps that include the Phase One Study Area, and for all other available fire insurance information for the Site (i.e., inspection reports and Site plans). Opta did not identify any fire insurance information to be available for the Site.

A copy of the documentation received from Opta is provided in Appendix B.

4.1.4 Chain of Title

GHD retained Meridian Land and Title Searching Services to provide Property title records and other documents (lease agreements, easements, and environmental liens) associated with the ownership or occupation of the Site. The Property is legally described as Part Lot 8, Concession 7, East Gwillimbury, Part Lot 9, Concession 7, East Gwillimbury, Part 3 on 65R1801, East Gwillimbury. The chain-of-title for the Property, as identified from the Property title search, is as follows:

Summary of Title Search

Registered Owner	Ownership Period
PIN 03443-0024	
Crown	Prior to 1851
Joel Crone, Lewis Hough, and/or Charles Traviss (parts)	1851 – 1894
Arnold Haight	1894 – 1904
Thomas Watts	1904 – 1959
Edward Jackson, Norma Jackson	1959 – 1961
Edward Jackson, Norma Jackson, John Jackson	1961 – 1969
Overholt Farm Limited	1969 – Present

An agreement related to aggregate extraction was registered on title in 1992 between Floyd Preston Limited (Overholt Farm Limited) and the Town of East Gwillimbury.

No lease agreements, easements, or environmental liens were identified to be associated with the Site.

A copy of the Property title documents received is provided in Appendix C.

4.1.5 Historical City Directories

Historical city directories generally document the occupants of municipal address on a yearly basis. A municipal directory search was conducted by GHD at the Toronto Reference Library in Toronto, Ontario. Directories were reviewed for the years of 1969-1970, 1975, 1985, 1989, and 1994. The municipal directories did not list the Site or surrounding properties in any of the city directories reviewed.

4.1.6 Previous Environmental Reports

GHD was not provided any previous environmental reports for the Site.

4.2 Environmental Source Information

4.2.1 Regulatory Review

No concerns, complaints, notices of violation, or directives of an environmental nature issued against the Site by federal, provincial, or municipal environmental regulatory agencies have been disclosed to GHD.

The MOECC was contacted by GHD to provide information regarding any past complaints, violations, and/or MOECC directives concerning the Site. The MOECC responded that no records were found in response to the request. A copy of the MOECC response is included in Appendix D.

The Technical Standards and Safety Authority (TSSA) was contacted by GHD and asked to provide information concerning any licensed retail fuel outlets or registered private fuel outlets located at the Site. TSSA personnel provided e-mail correspondence to GHD dated October 17, 2017, indicating that they did not identify any records to be associated with the Site. A copy of the correspondence with the TSSA is included in Appendix D.

4.2.2 Environmental Databases Search

GHD contracted EcoLog Environmental Risk Information Services Ltd. (ERIS) to conduct a search of available federal, provincial, and private environmental databases. Based on the address of the Site, the database searches were completed to assist in the identification of environmental conditions at the Site and on adjacent properties. A summary of the pertinent findings from the database search is provided below. One record was identified for the Site, and a total of 16 records were identified for properties located within 250 metres of the Site. The complete database search report, which also identifies limitations associated with this information, is included in Appendix E. GHD verified the distances from the Site to properties within the 0.25 km radius using the York Region Geographical Information System (GIS) Interactive Map and Google Earth.

Water Well Information System **(WWIS)**	None	15
No records were identified in the WWIS database to be associated the Site. Fifteen records were identified in the WWIS database to be associated with properties located within 250 metres of the Site. The records were associated with domestic water supply wells, and abandoned water supply wells, which were installed or abandoned between 1959 and 2012. The wells were drilled to depths ranging between approximately 30 and 48 mBGS. The stratigraphy of the wells generally consisted of sands and gravels, and bedrock was not identified in any of the well records. At the time of the Site inspection, there was no visual evidence suggesting that a potable water well was located at the Site.

No records were identified in the SCT database to be associated with the Site. One record was identified in the SCT database to be associated with a property located within 250 metres of the Site. No records of environmental concern were identified in the SCT database.		
Anderson's Storage Tanks (**TANK**)	None	0

4.3 Physical Setting

The Site is located in an area of East Gwillimbury that is used primarily for agricultural and rural residential purposes. The Site and the surrounding adjacent properties were generally developed for agricultural or rural residential purposes since at least 1927.

4.3.1 Aerial Photographs

Aerial photographs were reviewed to generally document the development of the Site and properties in the vicinity of the Site, and to identify the existence of any significant areas of actual or potential environmental concern at the Site. Aerial photographs of the Site and surrounding area were obtained by GHD from the National Air Photo Library and the Regional Municipality of York for the years 1927, 1969, 1970, 1976, 1978, 1981, 1988, 1995, 1999, 2002, 2005, 2007, 2011, 2012, 2013, 2014, 2015, and 2016. Based on the history of the Site and the quantity and quality of the aerial imagery available for review, the selected time period between aerial photographs was determined to be suitable for the purposes of this Phase One ESA.

1927 Aerial Photograph (Scale 1:15,000): Review of the 1927 aerial photograph indicates that the Site was vacant undeveloped land or used for agricultural cropland purposes at that time. The farmstead adjacent to the north/west of the Site (surrounded by the northwestern portion of the Site) had been constructed, and appeared to consist of a house and barn with a similar size and orientation to the current farmstead on that property. A road or path is visible on the Site, extending easterly from the farmstead, through the northern portion of Site, and further east. The road or path appears to be for farm equipment or machinery to access nearby fields. Surrounding adjacent properties were vacant undeveloped land or used for agricultural purposes at that time. The

southern portion of the Site and the south and southwest adjacent properties are not visible in the aerial photograph, however Mill Road was visible to the southeast of the Site.

1969 Aerial Photograph (Scale 1:40,000): Review of the 1969 aerial photograph indicates that there had been no significant changes in land use on the Site or surrounding properties since 1927. One of the adjacent properties to the west of the Site had been developed with the construction of one building, which appeared to be for residential land use. The southern portion of the Site and the adjacent properties to the south and southwest of the Site were visible, and were vacant undeveloped land or utilized as agricultural cropland.

1970 Aerial Photograph (Scale varies): Review of the 1970 aerial photograph indicates that there had been no significant changes in land use on the Site or surrounding properties since 1969.

1976 Aerial Photograph (Scale 1:50,000): Review of the 1976 aerial photograph indicates that there had been no significant changes in land use on the Site or surrounding adjacent properties since 1970. Several properties adjacent to the west of the Site had been developed with the construction of buildings, which appeared to be for residential land use.

1978 Aerial Photograph (Scale varies): Review of the 1978 aerial photograph indicates that there had been no significant changes in land use on the Site or surrounding adjacent properties since 1976.

1981 Aerial Photograph (Scale 1:50,000): Review of the 1981 aerial photograph indicates that there had been no significant changes in land use on the Site or surrounding adjacent properties since 1978.

1988 Aerial Photograph (Scale varies): Review of the 1988 aerial photograph indicates that there had been no significant changes in land use on the Site or surrounding adjacent properties since 1981.

1995 Aerial Photograph (Scale 1:50,000): Review of the 1995 aerial photograph indicates that the Site appeared to utilized as a sand and gravel pit. The central and northeastern portion of the Site was being excavated. Structures that were similar in size and orientation to a scale and scalehouse appeared to be visible on the northeastern portion of the Site, however due to the scale and clarity of the aerial photograph, no additional details could be discerned. The southern portion of the Site was not excavated at that time. There were no significant changes in land use on the Site or surrounding adjacent properties since 1988.

1999 Aerial Photograph (Scale varies): Review of the 1999 aerial photograph indicates that the southern portion of the Site was being used for sand and gravel extraction at that time. The previously identified scale and scalehouse were visible on the northeastern portion of the Site. There were no other significant changes in land use on the Site or surrounding properties since 1995.

2002 Aerial Photograph (Scale varies): Review of the 2002 aerial photograph indicates that the sand and gravel excavation on the Site had increased in size and extended further to the south. There were no other significant changes in land use on the Site or surrounding properties since 1999.

2005 Aerial Photograph (Scale varies): Review of the 2005 aerial photograph indicates that the ground surface on the Site, near the southern, western, and northeastern Property boundaries had become vegetated since 2002, indicating that sand and gravel extraction was no longer occurring on these areas. A structure similar in size and orientation to an aboveground fuel storage tank was visible adjacent to the southwest of the scalehouse. There were no other significant changes in land use on the Site or surrounding properties since 2002.

2007 Aerial Photograph (Scale varies): Review of the 2007 aerial photograph indicates that the Site had been graded and appeared to no longer be used for sand and gravel extraction. The scale, scalehouse, and on-Site roadways visible in the 2005 aerial photo were no longer visible. An area in the central portion of the Site was deeper than the rest of the Site and appeared to contain standing water. There were no significant changes in land use on the Site or surrounding properties since 2005.

2011 Aerial Photograph (Scale varies): Review of the 2011 aerial photograph indicates that there had been no significant changes in land use at the Site. The ground surface appeared to be vegetated. There were no significant changes in land use on the Site or surrounding properties since 2007.

2012, 2013, 2014, 2015, and 2016 Aerial Photographs (Scale varies): Review of the 2012 through 2016 aerial photographs indicate that there were no significant changes in land use on the Site or surrounding properties since 2011.

Copies of the aerial photographs are provided in Appendix F.

4.3.2 Topography, Hydrogeology, Geology

The Site topography is uneven due to the former operation of the sand and gravel pit. The western, south, and eastern portions of the Site generally slope downwards towards the center of the Site. The perimeter of the Site has an elevation of approximately 270 to 275 metres above mean sea level (mASL), and the low area in the center of the Site has an elevation of approximately 250 mAMSL[1]. Regional topography generally slopes downward in a mostly northerly direction towards Lake Simcoe[2].

A review of quaternary geology for the Site indicates that the majority of the Site is located in a broad physiographic region known as the Simcoe Lowlands, however the southwestern portion of the Site may be located in the broad physiographic region known as the Oak Ridges Moraine[3]. Overburden in the vicinity of the Site is reported to consist of ice contact deposits consisting primarily of gravel and sands, with minor till including esker, kame, end moraine, ice marginal delta and subaqueous fan deposits[4]. The bedrock geology in the vicinity of the Site consists of shale,

3 Chapman, L.J., and Putnam D.F., “Physiography of Southern Ontario”, Ontario Geological Survey, Map P.2715 (coloured). Scale 1:600,000 dated 1984.

4 “Quaternary Geology of Ontario" [map]. Scale 1:1,000,000. OGS Earth Geoscience Data [computer files]. Sudbury, Ontario: Ontario Geological Survey & Ministry of Northern Development and Mines, 2011.

limestone, dolostone, and siltstone of the Georgian Bay, Blue Mountain, and Billings Formations, and Collingwood and Eastview Members. Depth to bedrock in the vicinity of the Site is greater than approximately 40 metres below ground surface (mBGS)[5].

A tributary of Mount Albert Creek is located approximately 700 metres southeast of the Site, and Franklin Pond is located approximately 800 metres east of the Site. Lake Simcoe is the nearest major waterbody and is located approximately 15 kilometres to the northwest of the Site.

Topographic information for the Phase One ESA study area is included on Figure 1. A discussion of water bodies located within the vicinity of the Site is provided in Section 4.3.4. Well records identified within the Phase One ESA study area are discussed in Section 4.3.5.

4.3.3 Fill Materials

At the time of the Site inspection, there was no evidence of imported fill observed at the Site. According to facility personnel, the former sand and gravel extraction areas were graded using on-Site material and overburden stripped from the Site prior to extraction, and no soil was imported to the Site as part of the grading.

4.3.4 Water Bodies and Areas of Natural Significance

There are no waterbodies located on the Site. A tributary of Mount Albert Creek is located approximately 700 metres southeast of the Site, and Franklin Pond is located approximately 800 metres east of the Site. Lake Simcoe is the nearest major waterbody and is located approximately 15 kilometres to the northwest of the Site.

In accordance with O. Reg. 153/04, an “area of natural significance” is defined as any of the following:

1. An area reserved or set apart as a provincial park or conservation reserve under the Provincial Parks and Conservation Reserves Act, 2006.
2. An area of natural and scientific interest (life science or earth science) identified by the Ministry of Natural Resources as having provincial significance.
3. A wetland identified by the Ministry of Natural Resources and Forestry as having provincial significance.
4. An area designated by a municipality in its official plan as environmentally significant, however expressed, including designations of areas as environmentally sensitive, as being of environmental concern and as being ecologically significant.
5. An area designated as an escarpment natural area or an escarpment protection area by the Niagara Escarpment Plan under the Niagara Escarpment Planning and Development Act.
6. An area identified by the Ministry of Natural Resources and Forestry as significant habitat of a threatened or endangered species.

[5] “Ministry of Environment and Climate Change Well Records” [map]. Scale varied. Government of Ontario [computer files]. Government of Ontario, 2017.

7. An area which is a habitat of a species that is classified under Section 7 of the Endangered Species Act, 2007 as a threatened or endangered species.
8. Property within an area designated as a natural core area or natural linkage area within the area to which the Oak Ridges Moraine Conservation Plan under the Oak Ridges Moraine Conservation Act, 2001 applies.
9. An area set apart as a wilderness area under the Wilderness Areas Act.

A summary of GHD's review is provided below:

1. The Site is not an area reserved or set apart as a provincial park or conservation reserve under the Provincial Parks and Conservation Reserves Act, 2006.
2. The Site is not considered to be an area of natural and scientific interest (life science or earth science) as identified by the Ministry of Natural Resources as having provincial significance. No areas of natural and scientific interest were identified to be located within 2 kilometres of the Site.
3. The Site is not a wetland identified by the Ministry of Natural Resources and Forestry as having provincial significance.
4. This Site was not identified as an area designated by the Town of East Gwillimbury in its official plan as environmentally significant, however expressed, including designations of areas as environmentally sensitive, as being of environmental concern and as being ecologically significant.
5. The Site is not an area designated as an escarpment natural area or an escarpment protection area by the Niagara Escarpment Plan under the Niagara Escarpment Planning and Development Act.
6. The Site and Phase One ESA Study Area was not identified by the Ministry of Natural Resources and Forestry as significant habitat of a threatened or endangered species.
7. The Site is not an area which is a habitat of a species that is classified under section 7 of the Endangered Species Act, 2007 as a threatened or endangered species.
8. The Site is located within an area designated as Oak Ridges Moraine Countryside Area, but not located within an area designated as part of the Oak Ridges Moraine natural core area or natural linkage area to which the Oak Ridges Moraine Conservation Plan under the Oak Ridges Moraine Conservation Act, 2001 applies.
9. The Site is not an area set apart as a wilderness area under the Wilderness Areas Act.

Based on the above information, and the definition of area of natural significance provided in O. Reg. 153/04, the Site is not considered to be environmentally significant.

4.3.5 Well Records

A search of the MOECC Water Well Information System database was conducted as a component of the EcoLog ERIS database search outlined in Section 4.2.2 in conjunction with a search of the MOECC Well Records Map available online. No records were identified on the MOECC Well Records Map to be associated with the Site.

Fifteen records were identified in the WWIS database to be associated with properties located within 250 metres of the Site. The records were associated with domestic water supply wells, and abandoned water supply wells, which were installed or abandoned between 1959 and 2012. The wells were drilled to depths ranging between approximately 30 and 48 mBGS. The stratigraphy of the wells generally consisted of sands and gravels, and bedrock was not identified in any of the well records. At the time of the Site inspection, there was no visual evidence suggesting that a potable water well was located at the Site. However, it is expected that a potable water well is associated with each of the adjacent residential properties to the north, south, and west of the Site as GHD understands that the area is not serviced with municipal potable water.

4.3.6 Site Operating Records

No specific Site operating records were identified to be associated with the Site.

5. Interviews

As part of the Phase One ESA, GHD interviewed Mr. Dave Jackson on October 23, 2017. Mr. Jackson is the owner of Overholt Farm Limited, which owns the Site. Mr. Jackson has been familiar with the Property since 1960. GHD also interviewed Mr. Larry Preston on December 12, 2017 by telephone. Mr. Preston operated the former sand and gravel pit at the Site, and is familiar with Site operations between approximately 1990 and 2005.

The information given to GHD by Mr. Jackson and Mr. Preston was compared to other information sources that were reviewed by GHD, and no contradictions were observed.

The interviews completed with Mr. Jackson and Mr. Preston was focused on the historical and current use of the Property, and the topics listed in Sections 13 and 14 of Schedule D of O. Reg. 153/04. Relevant information provided to GHD by those interviewed has been summarized in the following Sections

No other previous owners or occupants of the Site were available during the Phase One ESA to provide information concerning the historical operations conducted at the Property.

6. Site Reconnaissance

6.1 General Requirements

Mr. Nicholas Cole of GHD completed two Site inspections of the Property. The first Site inspection was completed on October 23, 2017 from approximately 9:00 a.m. to 1:00 p.m. Weather conditions during this Site visit were partially overcast with an ambient air temperature of approximately 15°C. The second Site inspection was completed on November 2, 2017 from approximately 9:00 a.m. to 12:00 p.m. Weather conditions during this Site visit were overcast with an ambient air temperature of approximately 10°C.

The Site reconnaissance included a walk-through of the Property to confirm the current Site conditions and identify any current land uses, which may have or may cause actual and/or potential

environmental impacts to the Site. Adjoining and neighbouring properties were observed from the Site and public access ways.

Photographs of the Site are included in Appendix G.

6.2 Specific Observations at Phase One ESA Property

6.2.1 Building and Property

The majority of the Site is currently vegetated. An asphalt-paved access road is present on the northwestern portion of the Site, north of the farmstead area on the adjacent property. The Property generally slopes downwards towards the center of the Site.

6.2.2 Current Site Operations

The Site is currently vacant and is not being used for agricultural purposes. There are no buildings or structures present on the Site.

6.2.3 Historic Site Operations

The Site was used for agricultural cropland purposes (primarily potatoes, corn, wheat, soybeans, and hay) from at least 1927 until 1990, at which time it was utilized as a sand and gravel pit. No specific information was available regarding the historic use of pesticides on Site. The potential use of pesticides on the Site is included in O. Reg. 153/04 as a PCA (#40 – Pesticides (including Herbicides, Fungicides, and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage, and Large-Scale Applications), and has been identified in this report as **APEC #1**.

The Site was operated as a sand and gravel pit from 1990 to 2005. Facility personnel stated that topsoil and overburden was stripped in 1990, and sand and gravel sales began in 1991. The rehabilitation of the sand and gravel pit was completed in 2005, and the Ministry of Natural Resources and Forestry aggregate license was surrendered shortly thereafter. The rehabilitation consisted of grading the ground surface to a gradual slope, re-distributing overburden soil that was initially stripped in 1990, and seeding the area with alfalfa and rye grass. During operation of the sand and gravel pit, there was reportedly a scale, scale house, and diesel fuel aboveground storage tank (AST) located on the northeastern portion of the Site. A water supply well was also present on the northeastern portion of the Site, which supplied water to a washroom located in the scalehouse. The washroom discharged to an on-Site septic system consisting of a septic tank and leaching field. The scale, scale house, AST, water supply well, and septic system were completely removed during closure of the sand and gravel pit. An asphalt driveway is still present on the northwestern portion of the Site, which was used to access the scale and scale house.

Equipment such as loaders and mobile aggregate crushers/stackers were reportedly refueled on-Site while the Site was operated as a sand and gravel pit. The diesel fuel was reportedly stored in an AST near the scale house. At the time of the Site inspection, there were no ASTs present at the Site. The historic storage of diesel fuel in ASTs is included in O. Reg. 153/04 as a PCA (28 – Gasoline and Associated Products Storage in Fixed Tanks), and has been identified as **APEC #2**.

According to facility personnel, equipment/vehicles operated at the Site during the operation of the sand and gravel pit consisted of a front end loader, bulldozers, excavators, and a screening plant. Crushing operations were completed periodically by a third party company that would temporarily bring crushing equipment on-Site, complete the crushing activities, and then remove all equipment related to the crushing operation. According to facility personnel, all vehicle/equipment maintenance was completed off-Site at a nearby sand and gravel pit, and any wastes generated remained on that other property until being transported off that property for disposal at licensed facilities.

6.2.4 Utility Services

Based on information provided to GHD by facility personnel, the Site is not currently serviced with any utilities. GHD did not identify any active utilities on Site during the Site inspection.

During the Site inspection, GHD observed a wooden utility pole on the northeastern portion of the Site, in the vicinity of the former scale and scalehouse. Disconnected electrical and telephone cables were visible on the wooden pole. Electricity was historically supplied to the Site to the former scale and scalehouse via a pole-mounted transformer historically attached to this wooden pole. Facility personnel stated the transformer was owned by Ontario Hydro and they were not aware of any spills or releases from the transformer. The pole-mounted transformer had been removed prior to the Site inspection. No other information was obtained during the Phase One ESA regarding the potential former pole-mounted transformer. Communication cables were also likely supplied overhead via this wooden pole. Both the power and communication cables may have extended underground from the wooden pole.

The use of transformers is included in O. Reg. 153/04 as a PCA (55 – Transformer Manufacturing, Processing and Use), and has been identified as **APEC #3**.

6.2.5 Underground Storage Tanks (USTs)

At the time of the Site inspection, no visual evidence (e.g., vent pipes, fill pipes, etc.) suggesting the presence of on-Site USTs was observed by GHD. Facility personnel were unaware of any historical or current USTs being present at the Site.

6.2.6 Above Ground Storage Tanks (ASTs)

As previously discussed, a diesel fuel AST was historically operated on the northeastern portion of the Site while the sand and gravel pit was in operation. Facility personnel stated the AST was 500 gallons in size and constructed of double-walled steel. Secondary containment was reportedly provided by a concrete structure with walls approximately 0.6 metres high. According to facility personnel, the AST was used to fuel on-Site equipment. Facility personnel reported that, to their knowledge, no spills or releases occurred from the former AST. At the time of the Site inspection, no evidence of current or past operation of ASTs at the Site was observed by GHD. Facility personnel were unaware of any other historical or current ASTs being present at the Site.

6.2.7 Floor Drains, Pits, and Sumps

Based on observations made by GHD during the Site inspection, no floor drains, pits, or sumps were located at the Site. Facility personnel were unaware of any historical or current floor drains, pits, or sumps being present at the Site.

6.2.8 Wastewater/ Sewers

Based on observations made by GHD during the Site inspection, no wastewater is generated on Site. Facility personnel were unaware of any historical or current wastewater generation at the Site.

6.2.9 Stormwater/ Surface Water

Stormwater generated at the Site either infiltrates the ground surface, or is directed by overland flow towards either the Property boundaries, or the low area in the center of the Site. At the time of the Site inspection, no visual evidence of impact from surface water run-on from adjacent properties was observed by GHD. No sources of adverse impact to storm water generated at the Site were observed by GHD during the Site inspection. Facility personnel were unaware of any potential sources of stormwater impact to the Site.

6.3 Enhanced Investigation Property

The Phase One ESA property is considered to be an Enhanced Investigation property if it is currently used or has ever been used in whole or in part for industrial use, or commercial uses including a garage, a bulk liquid dispensing facility such as a gas station, or for the operation of dry cleaning equipment. As the Site has been used for industrial purposes (sand and gravel pit), the Site would be considered an Enhanced Investigation property.

All reasonable inquiries were made to obtain and review the following material with respect to the former use:

- Regulatory permits and records related to areas of potential environmental concern (documented in 4.2.1).
- Material safety data sheets (not available).
- Underground utility drawings (not available).
- Inventories of chemicals, chemical usage and chemical storage areas (documented in 6.3.4 and 6.3.5).
- Inventory of USTs and ASTs (documented in 6.2.5 and 6.2.6).
- Environmental monitoring data (not available).
- Waste management records (documented in 6.3.6).
- Process, production and maintenance documents (not available).
- Records of spills and discharges of contaminants (documented in 6.3.5).
- Emergency response and contingency plans (not available).
- Environmental audit reports (not available).

No previous reports or Site records were available for the Site.

Based on the information reviewed by GHD, the Site is considered to be an enhanced investigation property.

6.3.1 Asbestos-Containing Materials (ACM)

At the time of the Site inspection, GHD did not observe any evidence of ACM on Site. Facility personnel were unaware of any potential ACM on Site.

6.3.2 Polychlorinated Biphenyls (PCBs)

At the time of the Site inspection, GHD did not observe any evidence of on-Site PCBs or on-Site PCB waste storage. Facility personnel were not aware of any past PCB storage, handling, or disposal at the Site. However, as previously discussed, a pole-mounted transformer was historically operated on the northeastern portion of the Site. No information was available regarding the potential PCB content of the transformer. As previously discussed, the former transformer was identified as **APEC #3.**

6.3.3 Solid Waste/ Recyclable Materials

At the time of the Site inspection, GHD did not observe any evidence of on-Site storage of solid waste or recyclable materials. Facility personnel were not aware of any past on-Site storage of solid waste or recyclable materials.

6.3.4 Chemical and Raw Material Use and Storage

At the time of the Site inspection, GHD did not observe any chemical or raw material use/ storage on Site. Facility personnel were not aware of any chemical or raw material use and storage at the Site.

6.3.5 Subject Waste/ Hazardous Waste

The Property is not registered with the MOECC as a generator of Subject Waste. Based on GHD observations, no Subject Wastes have been generated or stored at the Site. Facility personnel were not aware of any historic Subject Waste generation or storage at the Site.

6.3.6 Chemical Spills/ Releases

At the time of the Site inspection, GHD did not observe any visual evidence of chemical spills or releases at the Site. Facility personnel were not aware of any chemical spills/releases in the past on Site.

6.3.7 Lead-Based Paint

The amount of lead in interior paint has been regulated since 1976 through Health Canada's Hazardous Products Act. There are no buildings or structures currently developed on Site and as such, GHD did not identify any evidence of lead-based paint on Site.

6.3.8 Chlorofluorocarbons

Based on observations made by GHD during the Site inspection, no equipment containing chlorofluorocarbons (CFCs) has been operated or stored at the Site. Facility personnel were not aware of any equipment containing CFCs to have been previously operated or stored at the Site.

6.3.9 Air Emissions

Based on GHD observations, no active air emission sources are currently present at the Site. There was no evidence of on-Site air emission sources identified by GHD.

6.3.10 Ionizing Radiation

At the time of the Site inspection, no sources of ionizing radiation were observed by GHD at the Site.

6.4 Written Description of Investigation

The Phase One ESA included a records review, interviews with facility personnel, a Site reconnaissance, and a review and evaluation of the information obtained during the Phase One ESA. The Site reconnaissance included a walk-through of the Property to confirm the current Site conditions and identify any current land uses, which may have or may cause actual and/or potential environmental impacts to the Site. Adjoining and neighbouring properties were observed from the Site and public access ways.

The findings from the assessment carried out pursuant to Sections 13 and 14 of Schedule D of O. Reg. 153/04, as amended, were previously discussed in Section 6.0.

7. Review and Evaluation of Information

7.1 Current and Past Uses

A summary of the current and past uses of the Site is provided below.

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, etc.
1927 to 1988	Private individuals (1851 to 1969), Overholt Farm Limited (1969 to present)	Agricultural cropland	Agricultural	The 1927, 1969, 1970, 1976, 1978, 1981, and 1988 aerial photos show the Site being used as agricultural cropland.

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, etc.
1988 to 1995	Overholt Farm Limited	Transitioned from agricultural cropland, to sand and gravel pit	Agricultural and Industrial	Facility personnel stated overburden was stripped in 1990, and sand and gravel sales started in 1991. The 1988 aerial photograph shows the Site being used for agricultural cropland purposes. The 1995 aerial photograph shows the Site being used as a sand and gravel pit.
1995 to 2005	Overholt Farm Limited	Sand and gravel pit	Industrial	The 1995, 1999, 2002, and 2005 aerial photos show the Site being used as a sand and gravel pit, with piles of stockpiled aggregate, scale, scalehouse, and an aggregate crusher/stacker is visible in several of the aerial photos.
2005 to 2007	Overholt Farm Limited	Transitioned from sand and gravel pit, to vacant unused	Agricultural or Other	Facility personnel stated that Site was rehabilitated by 2005, and the Ministry of Natural Resources and Forestry aggregate license was surrendered shortly thereafter. The 2005 aerial photo shows the Site being used as a sand and gravel pit. The 2007 aerial photo shows the Site as being no longer used for sand and gravel pit activities.

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, etc.
2007 to present	Overholt Farm Limited	Vacant, unused	Agricultural or Other	The 2007 aerial photo shows the Site as being graded relatively flat with a low area in the central portion of the Site, with the aggregate stockpiles removed or graded flat. The scale, scalehouse, and aggregate crusher/stacker are no longer visible, and there are no roads/paths through the Site except for the asphalt driveway along the northwestern portion of the Site.

7.2 Potentially Contaminating Activity

The MOECC provides a list of PCAs in Schedule D of O. Reg. 153/04, under the Environmental Protection Act. PCAs that have been identified to be on, in, or under the Phase One ESA Property, or located within the Phase One ESA study area and having the potential to contribute to an APEC are presented in Section 7.3.

7.3 Areas of Potential Environmental Concern (APEC)

The following APECs have been identified by the Phase One ESA records review and Site reconnaissance and are summarized in the table below. This table is used to list and describe each PCA at the Property and each PCA in the Phase One ESA Study Area that may be contributing to an APEC at the Property.

Table of Areas of Potential Environmental Concern
18725 McCowan Road, East Gwillimbury, Ontario
(Refer to clause 16(2)(a), Schedule D, O. Reg. 153/04)

Area of Potential Environmental Concern[1]	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity[2]	Location of PCA (on-site or off-site)	Contaminants of Potential Concern[3]	Media Potentially Impacted (Ground Water, Soil and/ or Sediment)
APEC #1: Potential Historic Pesticide Use	Entire Property	40. Pesticides (including Herbicides, Fungicides, and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage, and Large-Scale Applications	On-Site	Organochlorine (OC) Pesticides	Soil
APEC #2: Former Diesel Fuel AST	Northeastern Portion of Property	28. Gasoline and Associated Products Storage in Fixed Tanks	On-Site	PHCs and BTEX	Soil
APEC #3: Potential Former Pole-Mounted Transformer	Northeastern Portion of Property	55. Transformer Manufacturing, Processing, and Use	On-Site	PHCs, PCBs	Soil

Notes:

1 Area of Potential Environmental Concern means the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through:
   (a) Identification of past or present uses on, in or under the phase one property.
   (b) Identification of potentially contaminating activity.
2 Potentially Contaminating Activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area.
3 When completing this column, identify all contaminants of potential concern using the Method Groups as identified in the "Protocol for Analytical Methods in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011, as specified below:

ABNs	PCBs	Metals	Electrical Conductivity	SAR	Cl	OCs
CPs	PAHs	As, Sb, Se	Cr (VI)	High pH	CN^-	PHCs
1,4-Dioxane	THMs	Na	Hg	Low pH	BTEX	
Dioxins/Furans, PCDDs/ PCDFs	VOCs	B-HWS	Methyl Mercury		Ca, Mg	

7.4 Phase One Conceptual Site Model

The Site is an irregular-shaped parcel of land that is approximately 20 hectares (50 acres) in size. The Site is part of a larger parcel of land that is approximately 83 hectares (205 acres) in size and used for agricultural and residential purposes. The Site is currently vacant, vegetated land.

The majority of the Site is currently vegetated. An asphalt paved access road is present on the northwestern portion of the Site. The Site topography is uneven due to the former operation of the sand and gravel pit. The western, south, and eastern portions of the Site generally slope downwards towards the center of the Site. The perimeter of the Site has an elevation of approximately 270 to 275 mASL, and the low area in the center of the Site has an elevation of approximately 250 mAMSL[6]. Regional topography generally slopes downward in a mostly northerly direction towards Lake Simcoe[7].

A review of quaternary geology for the Site indicates that the majority of the Site is located in a broad physiographic region known as the Simcoe Lowlands, however the southwestern portion of the Site may be located in the broad physiographic region known as the Oak Ridges Moraine[8]. Overburden in the vicinity of the Site is reported to consist of ice contact deposits consisting primarily of gravel and sands, with minor till including esker, kame, end moraine, ice marginal delta and subaqueous fan deposits[9]. The bedrock geology in the vicinity of the Site consists of shale, limestone, dolostone, and siltstone of the Georgian Bay, Blue Mountain, and Billings Formations, and Collingwood and Eastview Members. Depth to bedrock in the vicinity of the Site is greater than approximately 40 metres below ground surface (mBGS)[10].

A tributary of Mount Albert Creek is located approximately 700 metres southeast of the Site, and Franklin Pond is located approximately 800 metres east of the Site. Lake Simcoe is the nearest major waterbody and is located approximately 15 kilometres to the northwest of the Site.

The Phase One ESA Conceptual Site Model is depicted on Figure 3.

8. Conclusions

Based on the results of the Phase One ESA, including the Site inspection, information provided by Site representatives and regulatory agencies, documents reviewed, the review of Site history, and receipt and review of information from the Ministry of the Environment and Climate Change (MOECC), the following APECs were identified to be associated with the Site:

---

APEC #1 – Potential Historic Pesticide Use (on-Site): The Site has been used for agricultural cropland purposes (primarily potatoes, corn, wheat, soybeans, and hay) from at least 1927 until 1990, at which time it was developed as a sand and gravel pit. No specific information was available regarding the historic use of pesticides on Site. The potential use of pesticides on the Site is included in O. Reg. 153/04 as a PCA (#40 – Pesticides (including Herbicides, Fungicides, and Anti Fouling Agents) Manufacturing, Processing, Bulk Storage, and Large Scale Applications), and has been identified in this report as **APEC #1**.

APEC #2 – Former Diesel Fuel AST (on-Site): Equipment such as loaders and mobile aggregate crushers/stackers were reportedly refueled on-Site while the Site was operated as a sand and gravel pit. The diesel fuel was reportedly stored in an AST near the scale house. At the time of the Site inspection, there were no ASTs present at the Site. The historic storage of diesel fuel in ASTs is included in O. Reg. 153/04 as a PCA (28 – Gasoline and Associated Products Storage in Fixed Tanks), and has been identified as **APEC #2**.

APEC #3 – Potential Former Pole-Mounted Transformer (on-Site): During the Site inspection, GHD observed a wooden utility pole on the northeastern portion of the Site, in the vicinity of the former scale and scalehouse. Disconnected electrical and telephone cables were visible on the wooden pole. Electricity was historically supplied to the former scale and scalehouse via a pole-mounted transformer historically attached to this wooden pole. Facility personnel stated the transformer was owned by Ontario Hydro and they were not aware of any spills or releases from the transformer. The pole-mounted transformer had been removed prior to the Site inspection. No other information was obtained during the Phase One ESA regarding the potential former pole-mounted transformer. The use of transformers is included in O. Reg. 153/04 as a PCA (55 – Transformer Manufacturing, Processing and Use), and has been identified as **APEC #3**.

8.1 Requirement for Phase Two ESA before RSC can be Submitted

Based on the information obtained in completing the Phase One ESA, a Phase Two ESA will be required before a RSC can be filed with the MOECC.

All of Which is Respectfully Submitted,

GHD

Nicholas Cole, B. Eng.

Thomas Guoth, P. Eng.

Warren Croft, P. Eng.

Appendices

Appendix A
Project Personnel Curricula Vitae

Nicholas A. Cole

Qualified: Bachelor of Science - Agriculture (B.Sc.), Bachelor of Engineering - Environmental (B.Eng.)

Connected: Engineer in Training, Professional Engineers Ontario

Professional Summary: Mr. Cole is an Engineering Assistant with approximately 8 years of consulting experience. Mr. Cole has completed over 60 Phase I and II Environmental Site Assessments (ESAs) at various industrial, commercial, and residential properties throughout Ontario. Mr. Cole has also completed project management and field oversight for numerous soil and groundwater remediation projects in Ontario. Mr. Cole's field experience encompasses all aspects of environmental investigations, including advancing boreholes and test pits, installing monitoring wells, Designated Substance Surveys, construction oversight, UST removals, soil and groundwater sampling, indoor air and soil gas sampling, and surveying. Mr. Cole's other experience includes the review and analysis of municipal, provincial, and federal environmental legislation.

Environmental Site Assessments

Project Engineer
Environmental Investigations | Confidential Electrical Utility | ON

Mr. Cole completed oversight of drilling and soil remediation activities at numerous sites associated with a large electrical utility.

Project Engineer/Project Manager
Remediations and UST Removals | Various Clients | ON

Project Engineer and Project Manager for numerous UST removals, and soil and groundwater remediations. Remedial quantities ranged up to 500,000 litres of impacted liquid, 6,000 tonnes of impacted soils, and UST volumes up to 45,000 litres in size. Contaminants of concern included VOCs, PHCs, metals, and PAHs.

Project Engineer/Project Manager
Phase I and II Environmental Site Assessments | Various Clients | ON

Completed over 60 Phase I and II ESAs at properties in Ontario and Manitoba. Mr. Cole has experience working on all types of properties, ranging from small vacant undeveloped lands, to large industrial operations with several hundred thousand square feet of building space.

Project Engineer/Project Manager
Environmental Investigation | Confidential Industrial Client | Toronto, ON

Mr. Cole completed oversight of the remediation of PHC and VOC impacted soil and groundwater. Mr. Cole later managed the completion of several years of soil vapour and groundwater monitoring to ensure compliance with a Certificate of Property Use (CPU). Based on the results of the monitoring and discussions with the Ontario Ministry of the Environment and Climate Change (MOECC), the CPU monitoring requirements were removed, which resulted in a cost savings to the client.

Project Manager
UST Removal and Groundwater Monitoring | Confidential University | ON

Mr. Cole was responsible for the maintenance of an on-going Groundwater Monitoring Program as part of a Contaminant Management Plan (CMP) at a university in Ontario. On behalf of the client, Mr. Cole requested a modification to discontinue the CMP groundwater monitoring based on the groundwater data generated to date. The Technical Standards and Safety Authority subsequently approved the request to discontinue groundwater monitoring, which resulted in a cost savings for the client.

Project Engineer/Project Manager
Environmental Compliance | Confidential Construction Company | Whitby, ON

Mr. Cole was Project Engineer and Project Manager for an environmental compliance project in support of highway lane widening. The project consisted of widening 12 kilometres of highway and nine stream crossings containing species regulated by the Endangered Species Act. Mr. Cole coordinated the removal of sediment from two stream crossings, which was approved by the Ontario Ministry of Natural Resources (MNR), the local conservation authority, and Fisheries and Oceans Canada (DFO).

Project Manager
Diesel Fuel Release | Confidential Fuel Supplier | Barrie, ON

Project Manager for a Focussed Subsurface Investigation (FSI) completed in response to a TSSA Inspection Report at a fuel supplier in Barrie, Ontario. The TSSA Inspection Report was completed following a diesel fuel spill and cleanup at the Client's property. The FSI report was completed in accordance with the requirements of the TSSA document entitled, "*Environmental Management Protocol for Operating Fuel Handling Sites in Ontario*". The TSSA accepted the Focussed Subsurface Investigation prepared by CRA and considered the matter resolved.

Project Manager
Asbestos Survey | Confidential Car Parts Manufacturer | Georgetown, ON

Project Manager for an asbestos-containing materials survey of an automotive parts manufacturing facility in Georgetown, Ontario.

Project Coordinator
Environmental Due Diligence | City of Toronto | Toronto, ON

Project Coordinator for a Phase I ESA, Phase II ESA, and Designated Substances Survey of a 10 hectare (25-acre) institutional/recreational property with 4,000 square metres (43,000 square feet) of building space in Toronto, Ontario.

Project Engineer
Environmental Due Diligence | Confidential Electrical Utility | Belleville, ON

Project Coordinator for a Phase I ESA and Phase II ESA of a former truck service centre in Belleville, Ontario.

Project Engineer
Environmental Due Diligence | Confidential Commercial Client | Mississauga, ON

Project Coordinator for a Phase I ESA of a 6,600 square metre (71,000 square foot) office building in Mississauga, Ontario.

Project Engineer/Project Coordinator
Environmental Due Diligence | Confidential Electricity Generator | Toronto, ON

Completed an environmental, geotechnical and subsurface utility investigation for a proposed 850 megawatt natural gas-fired generation station in Toronto, Ontario.

Project Engineer
Environmental Due Diligence | Confidential Commercial Client | Hamilton, ON

Completed a Phase I ESA and investigation of a leaking fuel oil AST at an apartment building in Hamilton, Ontario.

Project Engineer
Environmental Due Diligence | Confidential Commercial Client | Toronto, ON

Completed a subsurface investigation and removal of a spill containment UST for a flammable goods room at a medical testing facility in Toronto, Ontario.

Project Manager
Geotechnical Investigation | Confidential Industrial Client | Brampton, ON

Project Coordinator for a geotechnical investigation for proposed manufacturing equipment and storage silos at a plastic product manufacturing facility in Brampton, Ontario.

Project Engineer
Soil Investigation | Confidential Municipality | ON

Completed a soil salinity investigation of an agricultural property that was receiving surface water from neighbouring properties.

Project Engineer/Project Manager
Environmental Compliance | Confidential Industrial Client | Toronto, ON

Completed a sanitary sewer discharge investigation of an airfield lighting parts manufacturer in Toronto, Ontario. An indoor air assessment was also completed surrounding the plating process tanks at the site.

Warren Croft, P. Eng.

Qualified: Bachelor of Science, Engineering, B.Sc. Eng., University of Guelph, 2001

Connected: Registered Professional Engineer in the Province of Ontario, Qualified Person for Environmental Site Assessments (QP_{ESA}), Under Ontario Regulation 153/04

Professional Summary: Mr. Croft is an Associate with over 15 years of experience, and has managed more than 200 projects in Ontario, including brownfield redevelopments, Risk Assessments, Record of Site Condition, Phase I and II ESAs, environmental remediations, Designated Substances Surveys, asbestos abatements, and environmental compliance/permitting projects. Mr. Croft provides guidance to his clients regarding the management of environmental liabilities to support their long term business needs, and has assisted clients in the development and implementation of Risk Management Plans. Warren specializes in the completion of Environmental Site Assessments in Ontario, following the requirements of Ontario Regulation 153/04, as amended. He has acted as a Qualified Person for the filing of Records of Site Condition and the submission of Phase Two ESA Conceptual Site Models to support Risk Assessments. Warren also acts as a technical resource for GHD's Ontario offices with respect on Environmental Site Assessments in Ontario.

Mr. Croft also manages GHD's downtown Toronto office, and is responsible for supporting GHD's growth in the GTA environmental market, and ensuring that projects are appropriately staffed with qualified professionals.

Environmental Specialist (Secondment) | Infrastructure Ontario | West Don Lands, Toronto, ON | June 2010 – Fall 2012

Warren assisted Infrastructure Ontario in the management of environmental consultants and contractors at the West Don Lands in Toronto, Ontario in support of the redevelopment of a large brownfield property into the 2015 Pan Am Games Athletes' Village. Tasks included coordination of consultants and contractors, providing guidance to ORC staff on the environmental approvals process, and review of Phase I/II ESAs, Risk Assessments, Certificates of Property Use, and Records of Site Condition completed in accordance with the recently revised Regulation 153/04. Attended meetings with stakeholders including Ministry of Environment, City of Toronto, Waterfront Toronto, Infrastructure Ontario, and prospective developers to support Infrastructure Ontario staff in their role.

Project Manager
Ontario Place Redevelopment | Infrastructure Ontario | Toronto, ON | 2012 - current

Warren acts as Project Manager for due diligence activities at Ontario Place, which have included Designated Substances Survey, Building Condition Surveys, Phase One and Two ESAs, and Geotechnical Investigations. Warren is currently managing the completion of a Phase One and Two ESA, Risk Assessment, and Record of Site Condition for a portion of the east island, to support the Urban Park and Waterfront Trail project. Warren also provides guidance to Infrastructure Ontario and their park design team regarding the design and construction of Risk Management Measures and imported soil quality requirements, to ensure that ongoing construction is consistent with the Risk Assessment and that the soil brought to the proposed park is suitable for use at Ontario Place.

Environmental Lead
Milton District Hospital | Shared Services West | Milton, ON | 2013 - 2014

Warren acted as the Environmental Lead for environmental investigations at Milton Hospital, including the completion of Phase One and Two ESAs and coordination of asbestos sampling activities. Worked with the geotechnical lead to ensure that appropriate environmental samples were collected, while minimizing the number of boreholes/monitoring wells at the site. Assisted Milton Hospital and Shared Services West staff in negotiating environmental management requirements with the municipality and Infrastructure Ontario

Environmental Lead
West Park Healthcare Centre Redevelopment | Toronto, ON | 2016

Environmental lead for the completion of Phase One and Two Environmental Site Assessments in support of the proposed expansion of the facility. Supported client decision making regarding environmental risk, potential sources of environmental impact, and soil/groundwater management during future construction.

Project Manager | OPG Lakeview | Mississauga, ON | 2015 - 2016

Warren acts as the project manager for ongoing environmental activities at the former OPG Lakeview powerplant. GHD has completed extensive environmental investigaitons, focused environmental remediation, and Risk Assessment activities in support of OPG's land use and disposition planning. Currently supporting OPG's

goals of facilitating the redevelopment of the Site in accordance with the Inspiration Lakeview vision.

Qualifed Person (ESA)
Proposed ErinOak Kids Brampton | Infrastructure Ontario | 2014 - 2015

QP_{ESA} for the filing of Records of Site Condition for two parcels of land associated with the proposed ErinOak Kids Brampton facility. Coordinated the completion of Phase One and Two ESAs, provided guidance to the current property owner (City of Brampton) regarding the RSC process and the documents that must be prepared and signed by the owner to support the RSC filing, and coordinated with MOECC Brownfields group staff regarding the RSC filing. Filed two RSCs on the Ontario Environmental Site Registry, which were acknowledged by MOECC.

Project Manager
Seneca College King Campus Expansion | Seneca College | King City, ON | 2014 - 2015

Warren acted as Project Manager for the completion of environmental and geotechnical investigations at King City campus of Seneca College in support of a proposed building expansion following Infrastructure Ontario's AFP model. Based on the results of preliminary environmental investigations, a Due Diligence Risk Assessment was completed to document potential environmental risks associated with road salt impacts to the Site. GHD's team worked with Seneca College staff to complete the work at an active educational facility, while minimizing impacts to staff and students. He coordinated site access, including work around entrance roads, along Dufferin Street, and within active agricultural fields and acted as technical lead for environmental components of the project.

Project Manager | Environmental Due Diligence for Fortune 500 Client | Toronto, ON | 2016

Warren acts as the project manager for the completion of Phase I ESAs, Phase II ESAs, property condition assessments, remedial cost estimates, and risk evaluations for three industrial properties. GHD's client was considering the acquisition of the three properties, and required technical guidance regarding environmental liabilities, and options to mitigate environmental risks for the long term use of the Site.

Project Manager
Thistletown Regional Campus | Infrastructure Ontario | Toronto, ON | 2013 - present

Project manager for the completion of Phase I and II ESAs, completion of designated substances surveys, design and oversight of remedial program, and completion of a due diligence risk assessment at the Thistletown Regional Campus in Toronto, Ontario. Coordinated access with facility personnel, and developed specific health and safety protocols to ensure that investigative activities did not pose a risk to property residents.

Environmental Site Assessment Lead
Upper York Sanitary Sewer | Regional Municipality of York | York Region, ON | 2014 - 2016

Warren acts as the Environmental Site Assessment Lead for the completion of Phase One and Two ESAs to support property acquisition and project planning for the Upper York Sanitary Sewer project. He works with the other discipline leads to ensure that project milestones are met and the client's environmental liability is minimized during property acquisition and construction.

Project Manager
Etobicoke General Hospital | William Osler Health System | Etobicoke, ON | 2014 - 2015

Warren acted as Project Manager for the completion of environmental and geotechnical investigations at Etobicoke General Hospital in support of proposed redevelopment. Coordinated site access, including work around emergency room entrance, main entrance, and visitor parking areas. Acted as technical lead for environmental components of the project.

Project Manager
Proposed Mackenzie Vaughan Hospital | Infrastructure Ontario | Vaughan, ON | 2013 - 2015

Warren acted as Project Manager for the completion of environmental, geotechnical, and hydrogeological investigations at the proposed Mackenzie Vaughan Hospital. The project was completed following Infrastructure Ontario's Alternative Financing and Procurement (AFP) Guidance Document for Environmental and Geotechnical Investigations. GHD also worked with staff and consultants from the City of Vaughan to support the remediation of localized soil impacts and the filing of a Record of Site Condition. He coordinated site access and acted as technical lead for environmental components of the project.

Project Manager
Former St. Thomas Psychiatric Facility | Infrastructure Ontario | St. Thomas, Ontario | 2012 - 2013

Project manager for the completion of a Phase One ESA and Soil/Groundwater quality investigation at the St. Joseph's Regional Mental Health facility in St. Thomas, Ontario. Completed interviews with facility personnel, inspected client and resident spaces, and coordinated health and safety requirements for the completion of the soil and groundwater sampling activities.

Environmental Lead and QP_{ESA}
Ford St. Thomas Assembly Plant | St. Thomas, ON | 2014 - 2016

Warren acted as the lead environmental site assessor and QPESA for the completion of Phase One and Two ESAs at the Ford St. Thomas facility. Obtained Record of Site

Condition (RSC) for one portion of the Site, and supported GHD's Risk Assessment and Remediation teams in the assessment and remediation of the other portions of the Site.

Team Member
Review of Excess Soil Management in Ontario | 2015

Warren was a member of CRA's project team, to complete a review of excess soil management in Ontario. Warren's role focused on identifying common practices, and best practices among contractors, municipalities, and government related agencies, to support the development of an improved process to manage excess soil in Ontario.

Project Manager
Due Diligence – Confidential Location | Infrastructure Ontario | 2013 - 2015

Project Manager for the completion of a Designated Substances Survey and Phase One ESA at a potential redevelopment property in Toronto. Subsequently provided technical guidance to Infrastructure Ontario regarding the disentanglement of the building heating system from adjacent structures, including the removal of asbestos on piping. Provided recommendations regarding building ventilation requirements to prevent mold growth. Currently working with Infrastructure Ontario to develop abatement specifications for the Designated Substances in the building.

Technical Lead
Vendor of Record, Central and Southwestern Regions | Infrastructure Ontario | Ontario | 2012 - 2016

Warren acts as a technical lead and primary contact for CRA's Vendor of Record contract with Infrastructure Ontario, which has included Phase One and Two ESAs, designated substances surveys, remediation oversight, Risk Assessment, and Records of Site Condition. Warren attends monthly vendor calls, tracks performance of CRA's projects, acts as a key technical contact regarding environmental site assessments, and also manages a variety of Infrastructure Ontario projects.

Environmental Lead
480 Lakeshore Blvd. East | Waterfront Toronto | Toronto, ON | 2011 - 2016

Warren acted as the technical lead and primary Site Assessor for the completion of a Phase I ESA of a former bulk fuel storage facility. Warren provided guidance to the project team regarding the findings of the Phase I ESA and the requirements for soil and groundwater sampling at the Site. Warren subsequently supported the construction of specific Risk Management Measures to comply with City of Toronto requirements.

Project Coordinator
Risk Assessment | Confidential Fortune 500 | Mississauga, Ontario | 2012 - present

Project Coordinator and QP_{ESA} for a Phase One ESA, Phase Two ESA, and Risk Assessment of an industrial brownfield site. The project included development of risk based remedial targets for soil remediation, followed by the completion of a Risk Assessment to manage remaining soil and groundwater impacts.

Environmental Lead
Burnhamthorpe Road Watermain Twinning | Regional Municipality of Peel | Mississauga, ON | 2014 - present

Warren acts as environmental lead and completed a Contaminant Inventory and a Phase One ESA to support the Region's project planning. Warren provided guidance regarding identifying higher risk properties and potential contaminant sources within proposed construction areas, and provided recommendations regarding environmental risk at the higher risk properties.

Environmental Lead
Soil Characterization Program | Waterfront Toronto | Toronto, ON | 2016

Technical advisor during the environmental investigation of a portion of Toronto's Port Lands area, in support of the re-routing of the mouth of the Don River. Supported GHD's project management team and field team in the interpretation of historical records, and completion of soil and groundwater sampling at the site.

Project Manager
Risk Assessment | Confidential Fortune 500 | Toronto, ON | 2013 - present

Project Manager and QP $_{(ESA)}$ for the completion of a Phase One and Two ESA, and Risk Assessment at an active industrial property in Toronto, Ontario, completed to support the sale of the property, and to document liabilities at the time of the sale.

Project Manager
Risk Management Measure Implementation | Toronto Condominium | 2010 - 2013

Project Manager for the oversight of Risk Management Measure (RMM) implementation, to comply with the requirements of a Certificate of Property Use. Activities completed by CRA included preparation of soil and groundwater management plan, preparation of Health and Safety Plan, dust monitoring, soil tracking, barrier construction inspection, and reporting. Warren acted as Project Manager and primary liaison for the client and their contractor, to ensure that the Certificate of Property Use requirements were understood and implemented.

Project Coordinator
Risk Evaluation | Confidential Commercial Property | Toronto, ON |2013 - 2014

Warren acted as project coordinator during a risk evaluation project, to support a potential property sale. His scope included coordinating access to an active facility, discussing the scope of work with potentially affected tenants, coordinating soil, groundwater, and indoor air monitoring activities, and reporting. The project team subsequently completed a risk evaluation, supported with Risk Management Measures developed by Warren and his team. The client was able to complete the transaction of the property, despite documented environmental liability concerns.

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

THIS A G R E E M E N T made, in triplicate, this 23rd day of July, 1990.

BETWEEN:

THE CORPORATION OF THE TOWN OF EAST GWILLIMBURY

(hereinafter called the "Town")

OF THE FIRST PART;

and

FLOYD PRESTON LIMITED, a private Ontario corporation with its head office in the Town of Whitchurch-Stouffville, in the Regional Municipality of York

(hereinafter called "Preston")

OF THE SECOND PART;

AND WHEREAS Preston has an extraction agreement on certain lands situate, lying and being in Lots 8 and 9, Concession 7 of the Town of East Gwillimbury, a legal description of which is more particularly set out in Schedule "A" attached hereto; and which is shown on a survey attached hereto as Schedule "B" attached hereto;

AND WHEREAS Preston is desirous of having the said Lots 8 and 9, Concession 7, rezoned for aggregate extraction purposes;

AND WHEREAS the Town and Preston entered into a Development Agreement dated the 5th day of February, 1988 pursuant to the provisions of Sections 3.3.9 of Amendment 21 to the Official Plan of the East Gwillimbury Planning area;

AND WHEREAS the Town and Preston have agreed to amend the said Development Agreement to give effect to agreements made between them and to the provisions of the order of the Ontario Municipal Board, dated April 23, 1990;

AND WHEREAS this Agreement incorporates these amendments to the previous Development Agreement.

NOW THEREFORE WITNESSETH that in consideration of

the mutual covenants hereinafter contained, each of the parties agree hereto as follows:

1. The parties acknowledge the validity of the recitals heretofore contained.

2. Preston shall prior to the removal of any aggregate from such premises comply with the following:

   (a) Present to the Town for its engineers' approval , plans and specifications to up-grade the 7th Concession Road from the entrance as shown on the draft site plan to the Mount Albert Side Road to the appropriate M.T.C. specifications which will permit authorized annual daily traffic of up to 1,000 vehicles per day at full load;

   (b) Perform the necessary work to complete the reconstruction and paving of the road in accordance with the above standards as provided by the Town's engineers;

   (c) Pave the driveway entrance from the 7th Concession to the scale house area in a manner suitable to the Town Engineer;

   (d) The work and activities required by Subparagraphs (a), (b) and (c) of this paragraph shall be performed to the approval of the Town Engineer prior to extraction on the site, with the exception of extraction of those materials used for the improvement of the 7th Concession Road as herein required.

3. The Town and Preston acknowledge that in the event that the reconstruction takes place prior to the reconstruction of that portion of the 7th Concession Road required to be improved by a certain subdivision agreement registered as Plan 65M-2472 (Hickey Subdivision Agreement) the Town will reimburse Preston for that portion of the road required to be reconstructed under the Hickey Subdivision Agreement when the Town recovers pursuant to the Hickey Subdivision Agreement.

4. Attached hereto as Schedule "C" and forming part of this agreement are five drawings as follows:

Existing conditions drawing No. 84570 - 1 of 5
Proposed site development drawing No. 84570 - 2 of 5
Interim and final grading drawing No. 84570 - 3 of 5
Detail section drawing No. 84570 - 4 of 5

all revised as of the 6th day of June 1990 and prepared by Skelton Brumwell & Associates Inc. These drawings constitute the site plan under which the lands in Schedule "A" will be bermed, excavated and rehabilitated and are hereinafter referred to as the "site plans". Preston covenants and agrees to rehabilitate the lands in Schedule "A" in conformance with the interim and final grading and progressive rehabilitation plan referred to as drawing 3 of 5 of the site plan which said drawing has been drawn in accordance with requirements of the Town and the Ministry of Natural Resources. Without limiting the generality of the foregoing, more particularly Preston guarantees that it will, wherever it exists, preserve and conserve any topsoil on the said lands so that the said topsoil may be utilized in a general progressive rehabilitation of the lands for agricultural use in conformance with Ontario Government Policy.

5. Preston further covenants and agrees that the operation of the subject extractive industry will continue to be conducted in accordance with the latest and highest standards of the sand and gravel industry.

6. (a) Preston will conduct its operations in accordance with the site plans attached hereto and without limiting the generality of the foregoing, will cause Preston's gravel trucks and all gravel trucks, (whether loaded or unloaded), using the lands set out in Schedule "A" to travel to and from the Schedule "A" lands only over that part of the 7th Concession Road lying between the Mount Albert Side Road and the entrance/exit to the pit as shown on Schedule "B".

(b) Preston recognizes that the Town may pass a by-law or by-laws reducing the speed limit on the 7th Concession Road. Preston covenants to use its best efforts to ensure that all gravel trucks using the lands set out in Schedule "A" hereto will obey the applicable speed limit on the 7th Concession Road and all other applicable laws, by-laws and regulations governing the operation of vehicles on the 7th Concession Road.

7. (a) Preston will carry out its subject extractive operation in accordance with the provisions of any and all by-laws of the Town of East Gwillimbury governing the same and in the event that no such by-laws govern the hours of operation, such operation, which will include excavation, loading, grading, trucking, crushing, screening, and any other operation of any kind whatsoever shall be carried on only between the hours of 7 a.m. and 5 p.m. Mondays to Fridays inclusive, excluding legal holidays.

(b) Trucks shall not be refueled on the site nor will servicing or maintenance of any vehicle be permitted on the site.

8. (a) Preston agrees to carry out all of the provisions of any Provincial act or regulation respecting pits and quarries and more particularly to carry on its extractive operation on the subject lands so that it will not affect the wells or water tables in the area of the pit operation. Preston further undertakes, by the execution of this agreement, that it will, at its own expense, rehabilitate or restore any well in the area which in the opinion of the Ministry of the Environment, is affected to an extent requiring remedy by the operation of Preston at this site.

(b) Preston agrees that extractive operations will be limited to 1.5 metres above the high water table, and that it will maintain a minimum of 1.5 metres ground cover over the high water table at all times.

(c) Preston will, at its own expense, rehabilitate or restore any well in the area, including any water source serving the Franklin Trout Farm, which in the opinion of the Ministry of the Environment, is affected by this operation to an extent requiring remedy.

(d) A ground water monitoring program, including water quality testing, suitable to the Ministries of Natural Resources and Environment shall be initiated and implemented by Preston prior to the extraction of the site and shall continue throughout the term of the licence granted to Preston under the Aggregate Resources Act, with biannual testing or ground water levels. Preston shall forward the results of such testing to the Town Clerk.

9. Preston agrees to carry out its operation in such a manner that it will satisfy the requirements of the Ministry of the Environment as to water supply and disposal of liquid waste.

10. (a) Preston covenants and agrees that all entrances, landscaping and berming shall be constructed and maintained in accordance with the Town's regulations and approved site plan drawings attached hereto.

(b) The berm shown on the site plan shall be in place along the west limit and along the south limit to a distance of 200 m from the 7th Concession Road prior to the extraction of the site and shall remain in place until extraction from the site has ceased. Excavation shall be permitted prior to the completion of the berm only for the purpose of extracting materials for the construction of the berm and the road works on the 7th Concession as provided for in Paragraph 2. The remaining berms shall be in place within one year of the date of commencement of extraction.

(c) The landscaping plan shall be prepared by Preston and submitted by Preston to the Town Planner for approval prior to extraction of the site. Planting in accordance with this plan shall be completed within six months of the placement of the south and west berms and said planting shall be maintained for the extend of the pit licence.

11. (a) Preston covenants and agrees that apart from processing of aggregate from the Pit on the lands described in Schedule "A" as limited in this agreement there shall be no stockpiling or processing of other materials from other pits, no other processing or manufacturing of aggregate products or by-products such as asphalt, or any manufacturing nor shall there be any dumping of garbage, other refuse or any material other than topsoil that may be required for rehabilitation.

(b) Stockpiling of aggregate materials shall not exceed 9.1 metres in height.

12. Preston covenants and agrees that the crushing or screening of aggregates shall not take place on more than 25 different days in each calendar year the subject pit is in operation, and Preston further covenants and agrees that the crushing and screening of aggregates will not occur simultaneously.

13. Preston will carry on its extractive operation in such a manner that it satisfies the requirements of the Ministry of Natural Resources and the Ministry of the Environment, the Regional Municipality of York and the Lake Simcoe Region Conservation Authority at all times.

14. Preston shall carry on its extractive operation in such a manner that it satisfies the requirements of the Ministry of Natural Resources and the Ministry of the Environment as to dust control and the control of air pollution at all times, and in particular, Preston will control dust by the application of water or other materials judged environmentally safe by the Ministry of the Environment at rates and frequency acceptable by the Ministry of the Environment and the Ministry of Natural Resources. Petroleum products will not be utilized for this purpose.

15. Preston covenants and agrees not to conduct any blasting operations at any time on the Schedule "A" lands.

16. The subject pit shall not operate beyond a period of 15 years after the date of licencing except for rehabilitation, which shall commence immediately upon the termination of the operation and shall be completed within

1 year of the termination of the operation or 16 years from the date of licencing, whichever is earlier.

17. Whenever, pursuant to the provisions of this agreement any matter, question, or dispute is to be submitted to or determined by arbitration or if any question or difference shall arise between the parties hereto touching this agreement or the construction hereof, or the rights, duties or obligations of any person hereunder, or as to any other matter in any way arising out of or connected with the subject matter of this agreement, such matter, question, dispute or difference shall be referred to the arbitration of three (3) persons selected as arbitrators in the following manner: Preston shall select one (1) arbitrator, the Town shall select one (1) arbitrator and the two arbitrators so selected shall jointly select the third arbitrator. Should either party refuse or neglect to appoint an arbitrator within twenty (20) days after one party shall have appointed an arbitrator and serve notice upon the other party requiring it to appoint an arbitrator, then upon such failure, the arbitrator appointed by the other party may proceed and act in all respects as if he had been appointed by the person failing to make such appointment. If any arbitrator who has been selected shall refuse to act or shall be incapable of acting or shall die, the party by whom such arbitrator was appointed shall as soon as practical appoint an arbitrator in its stead. Preston and the Town shall each pay half of the fees and expenses of the arbitrator and shall each pay all the fees and expenses of their own witnesses and and counsel. The arbitrator shall possess such powers and duties as may be described by The Arbitrations Act of the Province of Ontario. The decision of the said arbitorator or a majority of them shall be final and binding upon the parties hereto.

18. In the event that the necessary by-law which will permit extraction on the subject lands is not approved by the proper authority this agreement shall become null and void.

19. This agreement shall enure to the benefit of and be binding upon the parties hereto, their successors and assigns.

IN WITNESS WHEREOF the parties hereto have hereunto affixed their corporate seals duly attested by their proper officers in that behalf.

Hello Trevor,

Thank you for your inquiry.

We have no record in our database of any fuel storage tanks at the subject address (addresses).

For a further search in our archives please submit your request in writing to Public Information Services via e-mail (publicinformationservices@tssa.org) or through mail along with a fee of $56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard) or with a Cheque made payable to TSSA.

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Thank you and have a great day,
Sherees

Subject: 11139698 - TSSA Tank Registry Database Search

Good afternoon,

GHD would like to request a search of TSSA's Tank Registry Database for any records pertaining to 18725 McCowan Road, located in Mount Albert, Ontario. GHD understands that the TSSA is in the process of changing over the request system for this. However, we are aiming to complete a Phase One ESA and would appreciate a timely response on this matter.

.Please contact me should you have any questions or concerns and thank you in advance for your help.

Regards,

Trevor Anthony, MSc

Dear Trevor Anthony:

RE: ***Freedom of Information and Protection of Privacy Act* Request**
Our File # A-2017-07520, Your Reference 11139891

This letter is in response to your request made pursuant to the *Freedom of Information and Protection of Privacy Act* relating to 18725 McCowan Road, Mount Albert.

After a thorough search through the files of the Ministry's York-Durham District Office, Investigations and Enforcement Branch, Environmental Approvals Branch, Environmental Monitoring and Reporting Branch, Sector Compliance Branch and Safe Drinking Water Branch, no records were located responsive to your request. To provide you with this response and in accordance with Section 57 of the *Freedom of Information and Protection of Privacy Act*, the fee owed is $30.00 for 1 hour of search time @ $30.00 per hour. **We have applied the $30.00 for this request from your initial payment. This file is now closed.**

The Ministry's Sector Compliance Branch **(or any office that may state this)** has informed our office that they had records for the above-mentioned site, however after a thorough and exhaustive search the records could not be located.

You may request a review of my decision by contacting the Information and Privacy Commissioner/Ontario, 2 Bloor Street East, Suite 1400, Toronto, ON M4W 1A8 (800-387-0073 or 416-326-3333). Please note that there is a $25.00 fee and you only have 30 days from receipt of this letter to request a review.

If you have any questions regarding this matter, please contact Rebeka Bogdan at Rebeka.Bogdan@ontario.ca.

Yours truly,

FOR

Janet Dadufalza

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Executive Summary: Summary By Data Source

EHS - ERIS Historical Searches

A search of the EHS database, dated 1999-Aug 2016 has found that there are 1 EHS site(s) within approximately 0.25 kilometers of the project property.

Site	Address	Distance (m)	Map Key
	18725 Mccowan Road East Gwillimbury ON	0.0	1

SCT - Scott's Manufacturing Directory

A search of the SCT database, dated 1992-Mar 2011* has found that there are 1 SCT site(s) within approximately 0.25 kilometers of the project property.

Site	Address	Distance (m)	Map Key
Harrogate Hills Riding School	18786 McCowan Rd Mount Albert ON L0G 1M0	202.3	17

WWIS - Water Well Information System

A search of the WWIS database, dated Mar 31, 2017 has found that there are 15 WWIS site(s) within approximately 0.25 kilometers of the project property.

Site	Address	Distance (m)	Map Key

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ***Note:*** *Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory: Provincial AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory: Provincial AGR

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2016

Abandoned Mine Information System: Provincial AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Nov 2016

Anderson's Waste Disposal Sites: Private ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Automobile Wrecking & Supplies: Private AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-May 2017

Borehole: Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2014

Certificates of Approval: Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Commercial Fuel Oil Tanks: Provincial CFOT

Since May 2002, Ontario developed a new act where it became mandatory for fuel oil tanks to be registered with Technical Standards & Safety Authority (TSSA). This data would include all commercial underground fuel oil tanks in Ontario with fields such as location, registration number, tank material, age of tank and tank size.

Government Publication Date: Feb 28, 2017

Chemical Register: Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-May 2017

Compressed Natural Gas Stations: Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 31, 2012

Inventory of Coal Gasification Plants and Coal Tar Sites: Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions: Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Sep 2017

Certificates of Property Use: Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Sep 2017

Drill Hole Database: Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886-Aug 2015

Environmental Activity and Sector Registry: Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Jul 2017

Environmental Registry: Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Sep 2017

Environmental Compliance Approval: Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Jul 2017

Environmental Effects Monitoring: Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches: Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Aug 2016

Environmental Issues Inventory System: Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event: Provincial EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

List of TSSA Expired Facilities: Provincial EXP

List of facilities with removed tanks which were once registered with the Fuels Safety Program of the Technical Standards and Safety Authority (TSSA). Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc. Tanks which have been removed automatically fall under the expired facilities inventory held by TSSA.

Government Publication Date: Feb 28, 2017

Federal Convictions: Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land: Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

Government Publication Date: Jun 2000-Mar 2017

Fisheries & Oceans Fuel Tanks: Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Apr 2015

Fuel Storage Tank: Provincial FST

The Technical Standards & Safety Authority (TSSA), under the Technical Standards & Safety Act of 2000 maintains a database of registered private and retail fuel storage tanks in Ontario with fields such as location, tank status, license date, tank type, tank capacity, fuel type, installation year and facility type.

Government Publication Date: Feb 28, 2017

Fuel Storage Tank - Historic: Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary: Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Jun 2017

Greenhouse Gas Emissions from Large Facilities: Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2015

TSSA Historic Incidents: Provincial HINC

This database will cover all incidences recorded by TSSA with their older system, before they moved to their new management system. TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. The TSSA works to protect the public, the environment and property from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from pipelines, diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks: Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

TSSA Incidents: Provincial INC

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Includes incidents from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

Government Publication Date: Feb 28, 2017

Landfill Inventory Management Ontario: Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Dec 31, 2013

Canadian Mine Locations: Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences: Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2017

National Analysis of Trends in Emergencies System (NATES): Federal NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports: Provincial NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2014

National Defense & Canadian Forces Fuel Tanks: Federal NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills: Federal NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Aug 2010

National Defence & Canadian Forces Waste Disposal Sites: Federal NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents: Federal NEBI

Locations of pipeline incidents from 2008 to present, made available by the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008 -Jun 2017

National Energy Board Wells: Federal NEBW

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES): Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory: Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory: Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-2014

Oil and Gas Wells: Private OGW

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-May 2017

Ontario Oil and Gas Wells: Provincial OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Oct 2016

Inventory of PCB Storage Sites: Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Sep 2017

Canadian Pulp and Paper: Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009

Parks Canada Fuel Storage Tanks: Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register: Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: 1988-Aug 2017

TSSA Pipeline Incidents: Provincial PINC

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. This database will include spills, strike and leaks from recorded by the TSSA.

Government Publication Date: Feb 28, 2017

Private and Retail Fuel Storage Tanks: Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water: Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Sep 2017

Ontario Regulation 347 Waste Receivers Summary: Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2016

Record of Site Condition: Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.
RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Aug 2017

Retail Fuel Storage Tanks: Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-May 2017

Scott's Manufacturing Directory: Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills: Provincial SPL

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jun 2017

Wastewater Discharger Registration Database: Provincial SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-2014

Anderson's Storage Tanks: Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks: Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Jan 2015

TSSA Variances for Abandonment of Underground Storage Tanks: Provincial VAR

List of variances granted for abandoned tanks. Under the Technical Standards and Safety Authority (TSSA) Liquid Fuels Handling Code and Fuel Oil Code, all underground storage tanks must be removed within two years of disuse. If removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Government Publication Date: Feb 28, 2017

Waste Disposal Sites - MOE CA Inventory: Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Jul 31, 2017

Waste Disposal Sites - MOE 1991 Historical Approval Inventory: Provincial WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System: Provincial WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Mar 31, 2017

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
